

# Sort Products for WooCommerce - Documentation

Learn how to efficiently **Sort your WooCommerce Products** with our **Sort Products for WooCommerce** plugin.

This documentation provides a **step-by-step guide** to **installing, configuring, and using** the plugin's powerful sorting features, including drag-and-drop functionality.

## Key Features

- Customizable product sorting for **categories, subcategories, and tags**.
- **Custom Sorting Option** with Drag & Drop.
- Various sorting options like Product ID, Name, Date, Price, etc.
- Sorting criteria include Rating, Reviews, Sales, and Stock Quantity.
- Hide WooCommerce Sorting dropdown from the frontend.
- Boosted conversions with organized product displays.
- Highlight desired products for better visibility.

Now let's explore the step-by-step guide to install and configure the Sort Products for WooCommerce Plugin.

## Step 1: Installation

1. **Download** the .zip file for [Sort Products for WooCommerce](#) from Extify Plugins.
2. Go to: **WordPress Admin > Plugins > Add New** to upload the file you downloaded with **Choose File**.
3. Now, Click on **Activate** the extension.  
**More information** at: [Install and Activate Plugins/Extensions](#).

## Step 2: Sort Out Products for each Category and Subcategory

Go to: **Sort Out Products** > Now **Click on the Sort Out Products for each Category** (All the categories and subcategories on your store will be shown here).

1. **Click on a Category** to Expand
2. Check to **Activate Sorting** for the Category
3. Select **Ascending Or Descending Order**
4. Now **Select Sorting Order** from the Dropdown Menu
5. **Save Settings**

### Note:

- You can apply only one sorting order for one category. It is impossible to apply multiple sorting orders for one category.

- ❑ Click to expand each category you want to apply sorting order for. You can edit the sorting order for each and every category and subcategory you want.

### Step 3: Sort Out Products for each Tag

Now Click on the **Sort Out Products for Each Tag** (All the tags you added to your store will be shown here).

1. Click on a tag to Expand
2. Check to **Activate** Sorting for the Tag
3. Select **Ascending** or **Descending** Order
4. Now **Select Sorting Order** from the Dropdown Menu
5. **Save Settings**

## Step 4: Custom Sort Products with drag & drop option

This feature lets you **sort products using a simple drag & drop** to position your products on the **shop page and category page**. All products are shown in a grid, you can simply drag & drop products to the desired position. Custom sorted products will appear as per configured position.

**Sort Products For WooCommerce**

General Settings | Sort Products For Each Category | Sort Products For Each Tag | **Custom Products Sorting**

**Custom Products Sorting**

**Enable/Disable**  Enable The Custom Sorting Products For Arhive Pages. For Your Ease, You Can Drag And Drop The Products To Sort Them. It Will Have Low Priority From Categories And Tags. It Updates The Products Menu\_order On Run Time And Will Set Their Menu\_order Even If You Do Not Enable It. WooCommerce Displays The Products Based On Their Menu\_order By Default.

20 entries per page

ID	Thumbnail	Name	SKU	Price	Order
2780		Affirm Water Bottle	24-UG06	\$7.00	1
32		Album	woo-album		2
2781		Dual Handle Cardio Ball	24-UG07	\$12.00	3
2750		Aim Analog Watch	24-MG04	\$45.00	4

**Note:** if you have hundreds of products then you can display the “All Products” on a single page in grid to custom sort. As, you cannot drag & drop products from navigation pages. You need to increase the number of product entries in product grid as shown below.

If you have 100+ products and entries limit is set to 20, then you can't drag products from position 21 or onward to top position. For this, **first you need to increase the entries limit as shown below.**

Enable The Custom Sorting Products For Arhive Pages. For Your Ease, You Can Drag And Drop The Products To Sort Them. It Will Have Low Priority From Categories And Tags. It Updates The Products Menu\_order On Run Time And Will Set Their Menu\_order Even If You Do Not Enable It. WooCommerce Displays The Products Based On Their Menu\_order By Default.

20 entries per page Limit products in grid to custom sort by simply drag & drop Search:

Thumbnail	Name	SKU	Price	Order
	Affirm Water Bottle	24-UG06	\$7.00	1
	Album	woo-album	\$15.00	2
	Dual Handle Cardio Ball	24-UG07	\$12.00	3
	Aim Analog Watch	24-MG04	\$45.00	4

## Hide Default Ordering on Frontend

You can hide the dropdown menu of default sorting order from the frontend to show products to the customers in a way you sorted only.

1. Click on **Sort Out Products Settings**
2. Enable **Manage Default WooCommerce Ordering To Show Or Hide From The Archive Pages**.

Sort Out Products For Each Category | Sort Out Products For Each Tag | **Sort Out Products Settings**

Settings saved.

**Global Settings**

**Enable/Disable**  Manage Default WooCommerce Ordering To Show Or Hide From The Archive Pages. Check to Hide Default Sorting Orders on Front-end
